

SDT 120

Maximum number of doors	1
Maximum door weight	100 kg
Maximum door width (excluding overlap)	1500 mm
Maximum opening width	1500 mm
Maximum door height	2400 mm
Glass thickness	10-12mm

The SDT glass door sliding system has a myriad of options for designers to choose from. The track can be soffit fixed, and combined with a fixed panel profile. The hangers are high quality with ball bearing nylon wheels giving a smooth near silent operation. Hangers can be fitted to either rounded or square patch fittings or to our standard door rail. Patch fittings and door guide are finished in satin stainless. Door rails are finished with either satin stainless or polished chrome covers and are made to measure.

Not to scale

Top track length: 3000mm

Ideal for: Residential and commercial glass sliding doors

Typical Layouts

Below are options for fixing the track to a structural support. In each diagram the hanger shown is a RH 68 but all hanger options can be used.

Bracket dimensions are shown on next page
